NITROGEN

Dakota 8 and 12 Nitrogen Inflation Systems

Watch the video with
your SmartPhone!

Perfect for your service truck!

If your definition of mobile is a service truck, then the Dakota 8 or 12 is what you need. Both are compact, easily mount to any service truck and work in all types of weather. Being from North Dakota, we tested in temperatures as low as 20 below zero, these generators produced a consistent purity in both extreme cold and extreme heat, day in and day out. These units efficiently produce the high volume nitrogen output you need, allowing you to service large tires quickly. And because of the PRISM Membrane, our systems also act as an air dryer, which means they produce a more consistent purity over the lifespan of the machine. Now you can offer nitrogen service to all of your accounts with equipment from one of the most trusted suppliers in the industry.

Proudly Made
in the U.S.A.

FEATURES

Compact nitrogen inflation system.....
Produces consistent purity in extreme weather...
Produces high volume nitrogen output.....
PRISM Membrane.....

BENEFITS

Easily mounts to any service truck
Tested in temps as low as 20 below zero!
Allows you to service large tires quickly
Acts as an air dryer; produces a more consistent purity

SPECIFICATIONS

Operation Temp-30 to 150 F
Inlet Port3/8 NPT
Outlet Port.....3/8 NPT

Pre-filters.....3
Dimensions.....48" x 27" x 18"
Weight Dakota 8250 lbs
Weight Dakota 12.....270 lbs
