

**AMERICAN FORGE & FOUNDRY, INC.™**

## **30 GALLON HEAVY DUTY TRUCK WASTE OIL DRAIN / EVACUATOR WITH CANTILEVER BASIN**

Model 8880

The AFF Model 8880 permits the safe removal of waste fluids through the dipstick via the included probes or by placing the 13 Gallon Basin beneath the vehicle and gravity draining. Cantilever Basin is evacuated into the main tank using a siphoning action by creating a vacuum in the main reservoir tank using shop air. Main storage tank is evacuated using shop air and the included evacuation hose attached to shop waste oil storage tank.

- Comes with a set of 6 Dipstick Evacuation Tubes and three connectors for BMW, Volkswagen and Citroen.
- Tank mounted oil-level sight gauge shows waste oil level in storage tank indicating how much capacity is remaining prior to the need to evacuate.
- Comes with 6' drain hose.
- Shipping weight: 152 lbs.
