Agri-Turf™ locker with  
optional ramp

Designed for herbicide, fungicide, pesticide, fertilizer and other agri-chemical storage, and backed by a 15-year structural warranty, this FM-approved locker is your solution for safe chemical storage and compliance. Green color complements settings and serves as an easy way to identify turf chemical contents. Customize your locker to meet specific applications with a variety of optional features and accessories, including loading ramp, grounding kit, fire protection, and heating and cooling packages.

Outdoor safety lockers promote safe storage, handling and disposal practices that minimize contamination of hazardous chemicals, while reducing worker exposure to hazards and injuries. Proper chemical storage not only reduces poison risks or other accidents that affect our environment and communities, but also prevents costly fines. Insurance carriers require safe chemical storage practices to be put into place before granting or renewing policies.
