

## STEALTH unit

### Specifications

- Maximum flow: 60 scfm at 100 psi
- Patented activated carbon 1st stage removes oil to 0.003 ppm
- Final filtration to 0.01 micron at 99.99998% efficiency
- Maximum pressure: 150 psi, maximum temp: 125 ° F
- High flow 3/8" regulator/gauge, 0-160 psi gauge
- 1/2" NPT inlet, 3/8" NPT outlet

### Replacement parts

- 1st stage element: 6960-1
- 2nd stage element: 3C-060
- 1st stage auto drain: N32-95-979
- 2nd stage manual drain: PC-02
- Pressure gauge: PG-160
- Pressure regulator: R30

### Benefits

- Patented Inverse-Flow® Technology
- Water, dirt, and oil removal
- Auto drain 1st stage
- Easy serviceability (no tools needed!)
- Snap-lock ring design
- Easy spin-on/spin-off design
- Heavy duty metal construction

### Applications

- Paint booths
- Lacquer spraying
- Critical air tools
- Prep stations
